ABOUT ME

I have been working in the IT field for over a year. I chose front-end development as my focus. I started my journey by learning the basics, such as HTML and CSS. Later, I familiarized myself with the SCSS preprocessor and gained experience working with the CSS framework Bootstrap.

Primarily, I write code in JavaScript and TypeScript, as TS adds static typing, which helps in the application development stage.

Currently, I am working with the React library, and for state management, I chose Redux, as they are considered one of the best combinations for Single Page Applications at the moment.

Additionally, for creating user interfaces, I use the React component library - Material UI. I have a good understanding of UI/UX design.

In my projects, I use additional tools such as: version control system - GIT, ESLint for higher-quality and well-formatted code, and the project management system - JIRA for task planning and execution.

SKILLS

Hard-skills
- HTML
- CSS / SCSS
- Bootstrap / Material UI
- JavaScript
- TypeScript
- React / Redux

Soft-skills
- Clean code
- Teamwork
- Time management
- Stress resistance
- Desire to learn
- Accurate

EDUCATION

2023 - ... **IT-Incubator**
- Web application development

2012 - 2015 **High School**
10r. - 12r. class
- Mathematical direction
- Estonian language
- English language

2003 - 2012 **Primary School**
1. - 9. class
- Basic education in Russian, as well as additional Estonian and English

WORK EXPERIENCE

My first project on HTML and CSS with responsive design.
- ilyaosw.github.io/Strategix

Developed a personal website using Bootstrap, SCSS, React, and TypeScript.
- ilyaosw.github.io/IljaOssipov

At the time working on a project in which I use TypeScript, React, Redux, and the Material UI component library.
